

# Open Mind Web App

employee goal management system

**COVID-19 has forced remote work to become the norm, but that doesn't have to be so demotivating as it sounds!**

Open Mind is a web app that hopes to reactivate the ambitious and motivated nature of Open Box employees. It allows employees to set and manage non-work related goals, while competing in teams. Employees can track the progress of their completed goals, team goals and also join team events.
