

Just talk, Bee Grateful does the rest

The project goal was to create an

innovative and proactive hive

management application that empowers

African beekeepers with verifiable data to

enhance efficiency, improve productivity,

and defend their professional practices.

Challenges Addressed

Manual and inefficienct data recording with notebooks

Hive data prone to irreversible loss

Lack of hive data overview and analysis

Lack of transparency of hive data between stakeholders

Value Added

Data Integrity

Enhanced Transparency & Credibility

Features Offered

Al-Driven Analytics and Reporting

Voice and Manual Data Input

> Proactive Issue Management

User Collaboration

Emergency

Cloud-Based Storage
