BSC CAPITAL

Our Ever-Growing Portfolio Of High-tech Businesses And Products

The exposure and expertise gained from our applied analytics business enables us to conceive software solutions that will solve ubiquitous business problems. BSC Capital is then able to implement and maintain these software products. This is something we do either in partnership with other firms or directly through our in-house teams.

- Our current portfolio of products and tools include:
- An enterprise tool focused on continuous improvement technology.
 - An object-oriented enterprise modelling tool.
 - A performance management software product.
 - A fintech credit solution.
 - A live monitoring and proactive safety management technology.

What Exposure Will You Get?

- Leading technologies.
- Full Agile Software Development Life Cycle – from analysis through to automated deployments.
- Professional software development teams.
- A multitude of business domains.

Do You Have What It Takes?

We are looking for engineers and scientific minds from different disciplines with the sophisticated computational skills required to tackle the complexity of modern digital challenges.
